The bidder understands that the owner may eliminate some of the above work due to budget constraints and should take the fact in consideration when pricing each of the projects individually. However the total cost of all NINE projects combined may not add up to the sum total of items 1-8 due to an additional discount applied to the total if all eight projects are awarded to the bidder. In that case the difference in the price between the sum total of items and the total listed price will be figured as a percentage difference and that percentage difference will be applied to each of the unit costs for each project item. In no case will the owner award the above work to multiple contractors on a project by project basis.
